Our Services

General visualization of our products

The word of mouth and the personal advocacy is the best promotion for any services, including the software development. Some of your relatives, friends or colleagues have definitely used the help of some developers to create a website, launch a web app or deploy a business analytics solution, and can introduce them to you.

your ideas come true.

What makes BlazeScripts talent pool unique?

The biggest problem of an IT consultancy is churn of engineers. The annual rate of those leaving is between 10 and 20%. The main reason is they don't like the project they are working on. Good engineers don't want to get stuck on a boring job - but it's often hard to their firm to find new project for them quickly.

We count with a big lovely software, web and software lovely development teams to cover your needs and make

Technologies and platforms we work

When you hire BlazeScripts teams - everybody wins!

YouTeam makes it possible for these engineers to make themselves available to be hired for your new project. The result is a classic win-win-win situation: the company doesn't lose the engineer and gets a new client, the engineers can choose themselves what they want to work on and you as a client get access to the previously concealed world largest pool of engineering talent.

Our technologies

We solve problems of all shapes and sizes. We have the benefit of working alongside our mobile app team to create seamless mobile-first experiences, while delivering fully-featured web apps with our team of full-stack web developers. We're experienced in front-end development, building backend infrastructure, API design and development, and strategy advising. We offer comprehensive solutions to fit the needs of our clients.
