Company

Budget Rent a Car System, Inc. is an American car rental company that was founded in 1958 in Los Angeles, California by Morris Mirkin. Budget's operations are headquartered in Parsippany, New Jersey.

With its original fleet of 10 cars, the company lived up to the 'Budget' name by undercutting the daily and per mile rental rates of the established airport based car rental companies. Mirkin was joined in 1959 by Julius Lederer (husband of columnist Ann Landers) who built the company, and made it an international company. In 1960, the headquarters moved to Chicago, Illinois and the rental fleet expanded with franchised and wholly owned rental outlets.

Challenge

QoDule didn't exist before us, our lovely client worked over an old system which had been developed under the obsolete technology several years ago, unfortunately new technologies handle the tech world right now and many systems which were as the best in their moment are a bit old right now and they need properly needed an improvement. Here is where BlazeScripts takes action on the matter and we solved their issues by development an improved system based on the already built database structure.

Solution

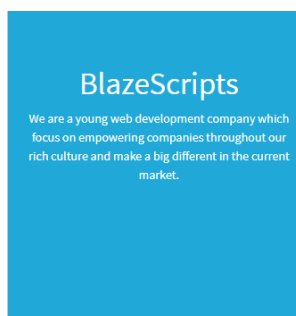

QoDule system demands precision and huge control over the **damage vehicle management**, the system is friendly and allow users have a great experience at the time they need to report an incident, taking decisions, or charge a customer the damage amount.

BlazeScripts
We are a young web development company which focus on empowering companies throughout our rich culture and make a big different in the current market.

The screenshot shows the QoDule web dashboard. It features a dark sidebar menu with options like 'Dashboard', 'Facturas y Reportes', 'Reportar Incidente', 'Usuarios', 'Incidentes', 'Repuestos', 'Estaciones', 'Documentos', 'Facturas Pendientes', 'Fotos Pendientes', and 'Salir'. The main content area has a grid of six cards: 'Reportes Realizados', 'Formulario de Reporte', 'Control de Usuarios', 'Estaciones', 'Repuestos', and 'Vehículos'. The footer includes '© 2018 - BlazeScripts - QoDule' and 'Powered by BlazeScripts'.
